

HANDY-PADDER

*Print matters.
Every detail counts.*

Printing means more today precisely because people are printing less. Every piece that gets printed carries more weight because choosing print has become an intentional decision.

When a customer chooses print, they are choosing something tangible, something meant to be held, noticed and remembered. That is **The Prestige of Print**. Every finished piece reflects the craftsmanship of your people, the standards of your shop and the reputation you've built.

EVERY LASTING IMPRESSION STARTS WITH THE RIGHT TOOLS.

For over 150 years, Challenge has built tools for printers who believe craftsmanship still matters. Inspired Innovation refined over generations puts that experience to work for craftsmen who hold every finished piece to a higher standard.

American Engineered. Michigan Made. Original Ownership. Together, they represent generations of people, knowledge and craftsmanship behind the tools on your floor, and a commitment to the people who count on them every day.

THE TOOLS CRAFTSMEN COUNT ON.

A finished pad is only as good as the care that goes into each one. Precise alignment and consistent pressure help your craftsmen produce work that reflects the standard of your shop.

The Handy-Padder brings that consistency to a compact tabletop design, providing even clamping pressure while simple operation keeps your people focused on the work.

Built for daily production, the Handy-Padder delivers dependable, consistent results so every finished pad reflects the standard of the people who produced it.

Your people will take pride in every piece they finish.

*Put the
Tools Craftsmen Count On
to work in your shop.*
